

## **TeraCenter, Inc. Establishes New Datacenter Facilities within Castle Access's Tier3 Enterprise Data Centers (EDC)**

*Established Data Security Specialists Move to New State-of-the-Art Datacenter*

**San Diego, CA, April 22, 2009** – TeraCenter Inc. went on-line at its new datacenter facilities within Castle Access's Rancho Bernardo facility. This strategic move enables TeraCenter to continuously improve the quality of its enterprise class backup and disaster recovery services. By leveraging Castle Access's expertise in datacenter management, TeraCenter is able to provide the highest quality environment for its customers and their digital assets.

This brand new, state-of-the-art facility has recently completed an SAS70 type II audit, ensuring the quality and dependability required to meet TeraCenter's rigorous standard of excellence. An SAS70 Type II audit is an industry standard that is designed to provide reasonable assurance that a given risk will be mitigated or detected in a timely manner to preclude service interruption, financial misstatement, or any other negatively perceived impact. Third-party independent auditing firm Grant Thornton performed the SAS70 Type II audit for the period that ended on May 31st and focused specifically on security, change, incident, and facility management in the datacenter environment.

"We are thrilled about our move to Castle Access," beamed Teracenter President Reid Warrick, "This is a top-notch facility and our clients deserve nothing less. With the infrastructure and security of this datacenter, TeraCenter can continue to safeguard our clients' businesses at the cutting edge of technology."

### **About TeraCenter**

Incorporated in April 2000 and based in San Diego, California, TeraCenter, Inc. is a privately held Managed Service Provider (MSP), focused on providing data storage and off-site data backup solutions. TeraCenter is dedicated to providing cost-effective data storage solutions that help organizations secure their information assets while meeting their Disaster Recovery (DR), Business Continuity and industry compliance needs.

### **About Castle Access**

Castle Access offers customized collocation solutions, network security and bandwidth-neutral network connectivity. With the addition of a new 88,000 square foot collocation facility, Castle Access provides unsurpassed power availability, HVAC, security, dual NOC and network diversity for Enterprise clients, solution providers, content providers and telecommunication carriers.
